

# Equipment and setup card

Keep reusable equipment and material identities together. Record individual tests in the linked material log.

## Project method and blank

Setup name

Transfer method

Blank name and exact SKU

Blank composition and coating

## Printed sublimation, if applicable

Printer model and region

Installed ink product

Paper product and size

Color software / profile / driver settings

## Cut-sheet workflow, if applicable

Cutter model and blade

Cutting mat type and usable area

Pre-inked transfer sheet product

## Press and reusable supplies

Press or oven model

Usable contact area / attachment

Protective layers and fixation supplies

Cleaning and heat-safe handling supplies

## Applicable instructions

Write N/A for the other method. Leave unknown specifications marked unknown. This card holds reusable setup facts; use one material-log record per run for source and actual time, temperature, pressure, preparation, cooling, and removal.
