

Material and settings log

Record one complete run: equipment, materials, source directions, actual settings, and outcome.

Run and equipment

Use one record per test or run. Mark method-specific fields N/A. Unknown source values stay unknown; your test does not replace supplier directions.

Run / test ID	Date
Project	Blank name and exact SKU
Transfer method	Printer model (if used)
Press or oven model	Cutter and mat (if used)
Ink product (if used)	Paper product (if used)
Pre-inked sheet (if used)	Color software / profile / driver settings

Source instructions

Source URL	Source checked date
Source equipment scope	Source time and unit
Source temperature and unit	Source pressure wording
Source preparation and orientation	Source cooling direction
Source peel / removal direction	

Actual run and result

Actual preparation and orientation	Actual time and unit
Actual temperature and unit	Actual pressure control
Actual cooling	Actual peel / removal
Result / photo reference	Next adjustment
